

Kerimcan Balkan

Full Stack Developer

kerimcanbalkan@protonmail.com | +90 5451380399 | [Portfolio](#) | [Github](#) | [Linkedin](#)

Summary

Passionate full-stack developer with a background in **Astronomy and Space Sciences** and hands-on experience building real-world web applications. Proficient in **JavaScript, Go, React, MongoDB, and PostgreSQL**, with a **strong foundation in problem-solving** and backend development. Seeking a **junior developer** role to contribute, learn, and grow in a professional environment.

Skills

Frontend: JavaScript, Typescript, React, Astro.js, TailwindCSS, Figma, Adobe Illustrator

Backend: Go, Node.js, Express

Databases: MongoDB, PostgreSQL

Other: Git, Docker, Linux

Projects

Cafe/Restaurant Order Management System

GO | React | Javascript | MongoDB | Tailwind

A web app for cafes and restaurants that allows customers to place orders, while waiters and cashiers track and update order statuses. Admins can view detailed statistics on orders, revenue, and employee performance. Key features include menu management, order tracking, user management, and real-time updates via SSE.

Save The Planet (2D Game)

Pixel Art | Typescript | Kaboom.js | MongoDB | Node.js

A 2D pixel-art game where players protect a planet from meteoroids. Integrated a leaderboard system using MongoDB to track top scores.

Gym/Pilates Website

Javascript | React | Astro.js

Developed a responsive intro website template for small businesses like gyms and pilates studios. The website provides an easy-to-use interface for potential customers to learn more about services and get in touch.

Education

Istanbul University

Istanbul, Turkey

Bachelor, Astronomy and Space Science
